INTERFACE SOLUTIONS

U.S. HealthTek

U.S. HealthTek offers strategic IT solutions for your healthcare organization's needs.

Our medical technologists and IT pros are industry leaders with over 20 years of medical lab and IT experience in lab processing, interfacing, test dictionary maintenance, LOINC© coding and cloud-based interfaces.

- Hospitals & Labs
- Home & Practice
- Document Management Application Server
- PACS Application Server
- ERP Application Server
- Practice Management Application Server

Cloud-Based Interfaces

Our project management partnerships are full-service, from start to finish. Get cloud-based interface services with comprehensive support and follow-through, including post-launch support and troubleshooting.

- Thorough vendor quoting and resource identification
- Expert validation, planning, and execution, including connectivity implementation
- Go-live planning, support, and troubleshooting
- Full supporting documentation for your team

Revenue Cycle Management

Billing and revenue management interfacing

Studies show that an invoice has the biggest impact on a client's impression of your company. We have proven experience in a wide variety of revenue cycle systems and will make sure your clients walk away with a stellar impression.

- Integration, routing, and processing of all claim-related data
- Claim information stored for volume and test mix analysis
- Adjudicated claim financials stored for reimbursement analysis at various levels (Payor, Ordering Facilities, Panels, CPT, etc.)
- Real-time dashboards with tabular and graphical reporting options, customized as needed

Lab Instrument Interfaces

Dependable, turnkey lab information systems and middleware products

- Connecting/testing interfaces via advanced cloud technology
- Hardware configuration
- Result-handling definition

Master Test Dictionary, Reference Lab Test Mapping and LOINC© Coding

Get experienced, thorough technologists with specific testing expertise to review, update, maintain and improve your critical processes.

- Lab-to-lab test comparison and mapping
- Cross-reference mapping documentation
- Code updates assistance for lab, HIS, and EMR systems
- Requirements template for export of lab test menus
- Review and Clarify test menus with lab resources
- LOINC© code mapping to LOINC© database
- Code merging to existing menus
- System updates consulting and support
