SUPPLY ORDERING APPLICATION
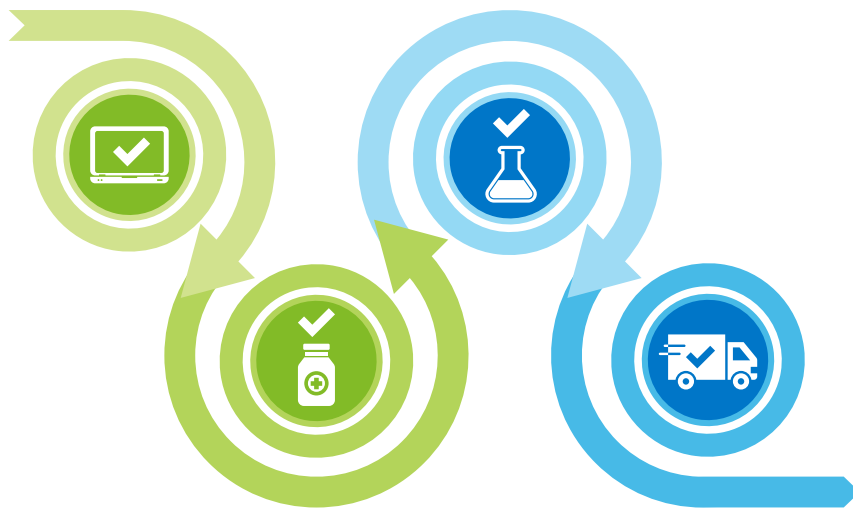

U.S. HealthTek

Less paperwork gives your team AND your bottom line a boost!

Processing and tracking supplies can be tedious, but are critical to efficiency. Our Supply Ordering Application ensures the ordering, tracking, fulfilling, and monitoring of client supply usage patterns are ongoing and accurate.

And it lets your company remain in compliance with Anti-Kickback Statue and Stark Law through automated monitoring of quantity of supplies and volume of specimens.

Lower your cost and spend less time pushing paper and more time doing work that matters most.

Supply Ordering Application

- Customized supply listings and ordering thresholds

- Fully automates the notification process

- Allows multiple supply hubs and client associations

- Tracks filled, unfilled, backordered, and cut order items

- Integrates with existing systems for reporting of events, including volumes vs. accessions

- Adapts to your team's existing user roles and responsibilities

- Determines lab-specific roles to fill supply orders as received
